

# License

The initial content of this wiki was extracted from the [Internet Archive](#) and contained the last public viewable content of the wiki which was once hosted at without-systemd<dot>org.

At the original wiki, there was no copyright notice and no license. Additionally, all work was done from pseudonymous accounts in collaborative work. The site at without-systemd<dot>org is no longer functional since at least a year (in January 2020). The holder of the domain without-systemd<dot>org is unknown.

Therefore the original content bears the criteria of an orphaned work. The legal situation of such orphaned works is still unclear.

Considering this fact, it seems the most appropriate way to handle this, is to publish modifications of the original work under public domain.

Therefore, all modified content in this wiki is licensed under [CC0 \(No Copyright\)](#)
