

Main Page

This is the resurrected without-systemd wiki, which was once hosted at [without-systemd<dot>org](https://without-systemd.org). The pages were fetched from [Wayback Machine](https://waybackmachine.org) and converted to dokuwiki syntax. Since there was no license notice on the original site, all pages are licensed under [CC0](https://creativecommons.org/licenses/by/4.0/) unless noted otherwise.

- [Use a proper init system instead of systemd.](#)
- Contribute to and use [Linux distributions](#) / [operating systems](#) without systemd.
- Spread the word.
